## Mutual Fire Insurance Dividends.

In August I returned \$38.17 in dividends on seven small policies, all written at the exact stock rates, and every cent absolutely saved to the policy holders. Don't you want to save from 20 to 50 per cent on your own insurance, or is it too small to bother about? I have three of these old Mutual Companies from 73 to 106 years old, and they have invariably returned a good dividend on every policy written. Better talk with me about it.

## THESE TWO

principles are absolutely necessary for those who would prosper. Spend as little as you can. Save as much as you can. A help to both is a bank account. One thinks twice about spending if he has to take the money out of the bank. And second thoughts are best. Secondly, a man with a bank account wants to see it grow and constantly endeavors to add to it.
